

Quote Verification Tool Quick Start Guide

The Quote Verification Tool is a quick and easy way to verify the Contract Line Item Numbers (CLINs) provided by a Contract Holder's quote. The CLINs and Part Numbers will be matched with their description, manufacturer, and other relevant data. This tool provides information in a report style with enhanced information including savings or identifying possible problem areas that may need attention prior to award. You can download reports in many different file types. This help document was designed to provide a quick start into how to use this new Web Tool. Please let us know if you have any questions, concerns or ideas at help@sewp.nasa.gov.

Verify products quoted through the SEWP Quote Request Tool

Quote Verification Tool

The Quote Verification Tool is used to verify and display quoted line item information from the SEWP catalog. This tool will also provide information regarding authorized reseller status and savings off the SEWP catalog price. This tool should only be used to verify quoted information. SEWP does not operate on a catalog search basis and therefore no catalog search capability is provided. To determine availability of products/services on SEWP, utilize the [Quote Request Tool](#).

To verify products quoted through the SEWP Quote Request Tool, select the RFQ/RFI number from the "RFQ [bid status]" list. Then select the Contract Holder. The Contract Line Item Numbers (CLINs) associated with the Contract Holder's quote will appear in the "CLINs and/or Part Numbers" table. (You may edit the list although that will then remove the linkage to the original quote.)

If you have received a SEWP quote from another source, you enter information from that quote. Select "Enter the Quote Number from the Contract Holder's Quote". Enter the Quote number supplied on the quote by the Contract Holder and select a Contract Holder from the "Contract Holder" list. Then enter your list of Contract Line Item Numbers (CLINs) or part numbers from the quote. You can enter the price and quantity of each item. This is optional.

* Required Field [Help \(PDF\)](#)

1 RFQ [bid status] * To verify quotes submitted through the SEWP On-line Quote tool, Please [Log-in](#)

Or

Enter the Quote Number from the Contract Holder's Quote *

2 Select a Contract Holder: * There are no quotes.

CLIN/Part Number*	Price	Quantity	
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="button" value="Add"/>

Thank you for using the quote verification tool. We highly encourage you to provide [feedback and recommendations](#) on how we can make this tool better and more useful. Thank you for using SEWP.

- 2) If you are not logged in to the RFQ tool, a link to log in will show. Click the link.

3) Provide your credentials and click the **Log In** button.

Quote Verification Tool

The Quote Verification Tool is used to verify and display quoted line item information from the SEWP catalog. This tool will also provide information regarding authorized reseller status and savings off the SEWP catalog price. This tool should only be used to verify quoted information. SEWP does not operate on a catalog search basis and therefore no catalog search capability is provided. To determine availability of products/services on SEWP, utilize the [Quote Request Tool](#).

To verify products quoted through the [SEWP Quote Request Tool](#), select the RFQ/RFI number from the "RFQ [bid status]" list. Then select the Contract Holder. The Contract Line Item Numbers (CLINs) associated with the Contract Holder's quote will appear in the "CLINs and/or Part Numbers" table. (You may edit the list although that will then remove the linkage to the original quote.)

If you have received a SEWP quote from another source, you enter information from that quote. Select "Enter the Quote Number from the Contract Holder's Quote". Enter the Quote number supplied on the quote by the Contract Holder and select a Contract Holder from the "Contract Holder" list. Then enter your list of Contract Line Item Numbers (CLINs) or part numbers from the quote. You can enter the price and quantity of each item. This is optional.
